Past performance does not ensure future results, and there is no assurance that the Fund will achieve its investment objectives. An investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted above. More current performance data through the most recent month-end are available at the Fund's website www.hussmanfunds.com. The Fund has the ability to vary its exposure to market fluctuations depending on overall market conditions, and may not track movements in the local value of international stock markets, particularly over the short-term. The Fund has the ability to hedge market risk by using stock index options, index futures, and equity total return swaps. While the intent of this strategy is long-term capital appreciation and protection of capital, the investment return and principal value of the Fund may fluctuate or deviate from overall market returns to a greater degree than other funds that do not employ these strategies. **Investors should consider the investment objectives, risks, and charges and expenses of the Fund carefully before investing. For this and other information, please obtain a Prospectus and read it carefully before investing. A copy of the Prospectus may be obtained at www.hussman.net or by calling 1-800-487-7626.
